***Election/Restrictions***

Applicant's election of Group I claims 1-7 and 21-25 in the reply filed on 25 May 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 and 21-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted prior art in view of Lin US 6,255,129.

Applicant's admitted prior art teaches a method for manufacturing a GaN based compound semiconductor light-emitting device including an n-GaN based layer, a MQW layer, a p-GaN layer, etching, forming a TCL and forming electrodes (see page1, line 15 to page 4, line 12).

The admitted prior art does not teach using a ZnO layer as the TCL.

Lin discloses forming a GaN based LED including a TCL (801) which can be made of ZnO (see fig. 8 and related text).

Therefore it would have been obvious to use the ZnO layer of Lin as the TCL in applicant's admitted prior art because ZnO has a better light transparency than the Ni/Au layer of the prior art.
